Obviously, more of you would like to have been included, but emails sent to long lists of people sometimes get treated as spam, and we had that problem.
Look in your Spam folder for "Invitation to co-sign letter to Yale."

More generally, we want to be able to successfully send emails to all class members from 1968yls@gmail.com – and here's what Google, at least (undoubtedly works with other email services also) says to ensure you will get them:

"Add the sender to your contacts: When you add the sender to Google Contacts, Gmail stops sending their messages to Spam." Please add.

Special Plea:

To those who've never sent the class website a picture – *Please send* – you currently, you and your grandkids, you & Send them to 1968yls@gmail.com
